

AMI introduces e-Learning Academy™

The AMI e-Learning Academy is a web-based training program developed to simplify the training functions of your restaurant.

The AMI e-Learning Academy provides a low-cost, all-in-one tool that features state mandated courses and customizable training content. With unlimited access to professional courses, your staff can train anytime, 24 hours a day, 7 days a week.

The powerful reporting tools enable you to track your employees' progress from their first lesson through course completion, and measure their success against store sales.

We know you and your staff are busy serving customers, and that's why we make the AMI e-Learning Academy's courses quick and easy to use. So, whenever there's time, students can login and complete a class, or you can login and check their progress.

All AMI e-Learning Academy training courses utilize the highest standards of the American Society for Training and Development, offering you the confidence and credibility associated with the world's largest workplace learning professional group.

Our goal is to make sure that you can use your training time as effectively as possible, while keeping costs down.

e-LEARNING ACADEMY™

AMI's e-Learning Academy will meet your training needs and help you reduce costs. Here's how!

Effective Online Training - Available Anytime, Anywhere

- Training software is available online offering unlimited web-based access
- Unique login for each student allows courses to be assigned directly to them
- Online training is faster and more effective than paper materials
- Streamline your training programs and reduce travel and training cost

Single Source Reporting - One Stop Shop for Tracking Staff Performance

- Measure return on investment
- Guaranteed distribution and compliance
- Online access to dozens of reporting formats, anytime you need them
- Evaluate course effectiveness and determine the necessary level of difficulty

Custom Training - Bring In Unique Location Content

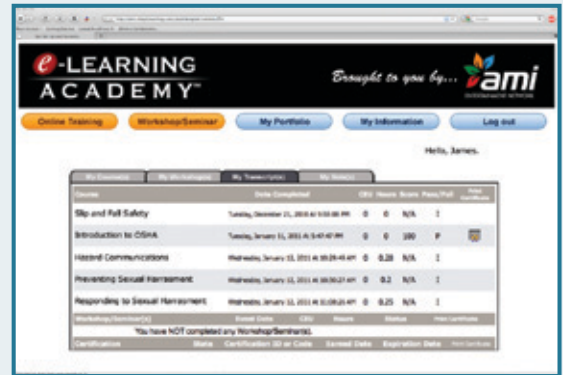

- Engaging, interactive content from already existing materials
- Professional SCORM compliant courses developed from existing Power Point programs, .PDF files or manuals
- Managed and delivered within the e-Learning Academy

Custom content examples:

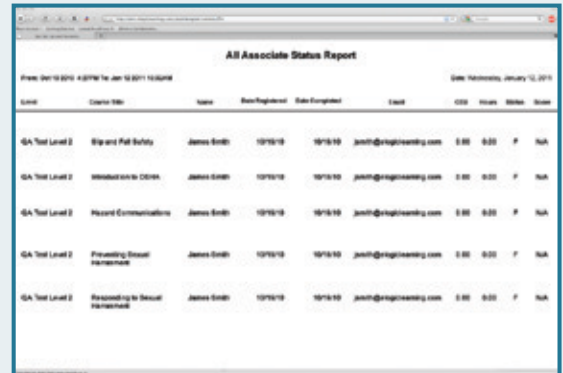

- Store Opening Packages: quickly get answers to questions and score applicants
- Limited Time Offers: Field reinforcement quizzes and learning vignettes to introduce promotions or keep important information top of mind
- Company history and orientation
- New menu launch
- New beverage launch

Industry Standards and State-Required Courses - Bundled for Easy Access

- Hundreds of personal development courses
- State mandated courses:
 - Sexual harassment
 - Food safety for both the staff and managers
 - Alcohol safety
